Education

Bachelor of Science: Information Technology | August 2019

American Military University - Charles Town, WV

Honors: Cum Laude (GPA 3.52/4.0)

Experience

Web Developer (Lead Web Developer) | December 2022 - Current

Leidos | Atlanta, GA

- Led the development of three projects within an agile environment, focusing on revitalizing existing webpages and introducing new ones to elevate the functionality and capabilities of a web application that directly supports the United States Air Force's U2 Dragon Lady.
- Led a team of eight front-end and back-end developers in executing development initiatives, ensuring successful project completion and improved user experience that exceeded client expectations.
- Executed strategic modifications to webpages, resulting in a notable enhancement of performance, accessibility, and adherence to best practices. This initiative significantly contributed to the expansion of the application's features and overall performance.
- Led and built UI and UX design efforts for a web application, ensuring a seamless and visually appealing user experience by collaborating closely with cross-functional teams, including developers and product managers, to translate business requirements into intuitive and engaging design solutions, staying abreast of industry trends and best practices.
- Designed and Implemented a framework for testing webpages to assist the Quality Assurance team, to include the use of Google's Open source, automated tool, Lighthouse.
- Assumed the role of a subject matter expert on the Web Content Accessibility Guidelines due to limited resources, ensuring strict adherence to accessibility standards.
- Created and oversaw detailed documentation elucidating front-end development procedures using Confluence, guaranteeing developers access to clear and easily navigable reference materials.
- Contributed to the optimization of work processes and workflows in JIRA.

- Conducted thorough analysis of diverse product issues, delivering timely solutions and, when necessary, implemented on-the-fly adjustments. Additionally, provided precise estimates for requested changes, ensuring swift and effective resolution.
- Led a client presentation, subsequently initiating and currently overseeing the redesign and development of the web application's home page. This initiative involves incorporating search functionality, updating the navigation bar, and implementing user-alert features for new content to enhance overall user experience and accessibility.
- Currently involved in an ongoing initiative to modernize an existing web application, transitioning it to leverage React and other modern frameworks and libraries, while implementing industry best practices for enhanced functionality and improved user experience.
- Currently leading an initiative to implement version control for web development, spearheading the adoption and integration of version control systems. Serving as the project administrator for the version control system, overseeing repository management, user access, and ensuring streamlined collaboration among development teams.

Application Support Engineer | November 2021 - December 2022

OneTrust | Atlanta, GA

- Leveraged the most recent iterations of HTML, CSS, and JavaScript to elevate user experience, delivering customized solutions across diverse use cases to meet customer requirements.
- Provided ongoing product support, troubleshooting, and pragmatic solutions for the most complex and critical issues that users face.
- Continued to develop and maintain deep knowledge of specific areas of the platform to include core web technologies, integrations, APIs, mobile application development frameworks for both Android and iOS platforms, and other supporting technologies by attending office hours, completing regular release trainings, and other testing with a variety of use cases.
- Worked directly with customers and colleagues to resolve hundreds of product issues by troubleshooting issues and providing possible solutions.
- Collaborated with other engineers, QA, customer success, and implementation to troubleshoot issues, identify root causes, and provide solutions.

Intelligence Analyst | December 2019 - December 2021

Cayuse Technologies - In support of the Cybersecurity and Infrastructure Security Agency | Arlington, VA

- Collection and passing of information from one shift to the next, collaboration and sharing of information that is vital to critical infrastructure and key resources, warning, and reporting, and answering requests for information.
- Perform triage on requests for information, issues, or events involving the nation's Critical Infrastructures (CI) and Key Resources.
- Evaluate current information and develop responses to critical information requirements.
- Monitor a variety of information sources, such as online media sources specific company news feeds, news media channels, weather channels, and particular websites for information relating to CI.

Deputy Sheriff III | July 2014 – December 2019

Cobb County Sheriff's Office | Marietta, GA

- Over 800 hours of law enforcement training
- 1-year experience on SWAT
- Execution of criminal arrest warrants, civil processes, and cooperation with other law enforcement agencies.

- Performance of civil section activities in preparation for and in service of civil processes received from the Magistrate, State and Superior Courts.
- Performance of activities associated with a multi-jurisdictional Narcotics Unit.
- Performance of security control operations in a penal institution, providing monitoring and security of inmates, civilian workers, contractors, and visiting law enforcement and court personnel, and security/fire control systems.
- Training and experience in the use of specialized tactics and equipment for hostage/barricaded suspect crises, high-risk warrant service, security for high-risk court trials, dignitary protection, detention facility disorders, drug related search warrants, and high-risk prisoner transports.

Sergeant – Non-Commissioned Officer in Charge of Intelligence Section | December 2010 – April 2016
United States Marine Corps | **Robins Air Force Base, GA**

- Mentored and assisted in individual and professional development of fellow Marines by providing counsel, advice, and direction.
- Supervision of embarkation and logistical duties and responsibilities.
- Effectively planned and supervised instruction for junior Marines.

Intelligence Analyst

- Routinely executed all functions of the intelligence lifecycle to meet intelligence community mission needs.
- Identified and collected needed intelligence data.
- Culled through large volumes of disparate information; organized and evaluated data; drafted and produced actionable intelligence products.
- Applied political, military, and social knowledge to judge data and draw conclusions.
- Ensured the timely delivery of reports and papers to appropriate parties.
